

# Parking at Belgium Cold Springs

## Fire Dept, Station One

### 7920 River Rd, Baldwinsville, NY

**B**elow is a map showing the fire station property. The areas for parking are lined in green. The areas NOT to park are in red. The entrance to the Community Room is the yellow arrow. Yes, you can park along one side of the road adjacent to the firehouse or in the lot on the south side of the firehouse. The grassy area north of the firehouse cannot be used as it is a leach field for the septic system. The area in front of the bay doors cannot be used due to the need to get the trucks out when there is a call.

If you need to drop something off, you may park by the entry door on the pavement where the red is, but then you must move to a parking spot!

*Yes, the Fire District is looking at adding lines to the parking area to help with parking. No, there are no plans to enlarge the parking area at this time.*

Park only where the **GREEN** arrows show

**Do not park in RED areas!**
